

TEXTILE PRODUCTS

In case of textile products, it is very important to keep specific parameters of the file because the textile materials are very prone to stretching. It is extremely important that you keep it in mind when designing artwork for textiles.

Below you may find specific requirements to preparing files for printing on chosen textile products.

Safe area:

The textile materials are prone to stretching. When designing the artwork, place a proper safe area as indicated below:

LENGTH OF THE PRINT	SAFE AREA (per page)
Up to 5m	6cm
From 5m to 10m	12cm
From 10 to 20m	25cm
From 20m to 30m	35cm
From 30m to 40m	45cm

ZEN Aluframe

When designing an artwork for the ZEN frames, the file needs to have a print bleed of 1,4 cm per side.

Products with templates

If you wish to order a product for which Labo Print provides a template, please use that exact template. The template must not be scaled or changed in any way.
